**About IMS:** Inventory Management System (IMS) allows stores to monitor company consumable goods, including reorder level, procurement requisition, P.O., store receipt, store issue voucher and stock talking.

From standalone operation to enterprise LAN and WAN solutions IMS holds the key to centrally controlling company consumable goods.

IMS has been developed on the world's number one renowned database software Oracle. The software is modular in design and can be customized or interfaced to your organizations current software. IMS safeguards client investment by being scalable. Thus as your business grows and changes IMS adapts to these new scenarios.

### Functionality
